

# Dust filters compliant according to EC 1935:2004

When supplying filtration articles, we ensure to comply with the required level of documentation and our foodstuff approved items are supplied in accordance to EC 1935:2004, EC 2023:2006 and (EU) No. 10/2011.

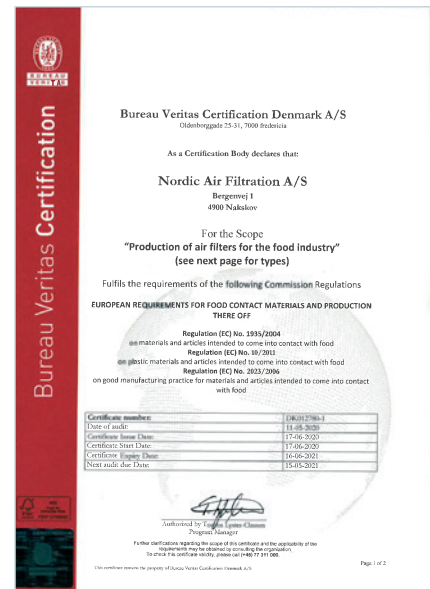

Nordic Air Filtration fulfills the European requirements for manufacturing of air filters for the food industry according to the following standards:

**Regulation (EC) No. 1935/2004** - on materials and articles intended to come into contact with food.

**Regulation (EC) No.10/2011** - on substances and plastic materials permitted in manufacture of Food Contact Materials that are intended to come in contact with food.

**Regulation (EC) No. 2023/2006** - on Good Manufacturing Practice (GMP) which applies to all food contact materials and all stages of manufacture, processing and distribution of materials and articles, up to but excluding the production of starting substances.

All the food producers situated in countries that are members of the EU must follow the regulations of EC 1935:2004 – regardless on whether the equipment or solutions are supplied from countries within or outside the EU.

These measures ensure that our customers can:

Secure food safety & quality

Comply with the highest hygiene standards

Build trust and reliability

Optimize production equipment

# Requirements we meet for our customers

The products designed for food contact are made respecting the Good Manufacturing Practice as part of the EC 1935 Regulation.

The dust filters used in the food process are subject to the EC 1935:2004 regulation, since are covered by materials and articles intended to come into contact with foods. Manufacturing our filters while satisfying the highest hygiene requirements is essential for the food & pharma production processes.

We ensure to provide solutions that meet the standards required by our customers and the latest legislation. Contact our sales team to learn more about the range of compliant products available.
