Hengst Quality and Performance

Established in 1958 | Family business for three generations
23 locations on 5 continents | 3,500 global employees

Hengst is producing transmission oil pans utilized by many major European OE brands. The Hengst portfolio now includes aftermarket models – with most parts in stock and ready to order.

Hengst is a leading supplier of filtration technology for engine and vehicle manufacturers. We're known worldwide for our customer service, lean structure, innovative technologies and operational excellence.
