

Hengst Filtration presents new CFO Jörg Schroeder

The business IT graduate comes to Münster from IT service provider Adesso.

Münster. Hengst Filtration introduced its new Chief Financial Officer (CFO) Jörg Schroeder on May 1. Mr. Schroeder joins Hengst from major German IT service provider Adesso and will be responsible for Finance, Controlling, IT, HR, Legal and Compliance. "Both the corporate vision 'purifying our planet' and the transformation from automotive supplier to filtration specialist convinced me from day one of the talks," says Mr. Schroeder. "Hengst is working for our planet and future generations, and that impresses me. At the same time, I find the transformation strategy and the resulting tasks incredibly exciting."

"We at Hengst are very much looking forward to working with Jörg Schroeder," added Chairman of the Supervisory Board Jens Röttgering and CEO Christopher Heine: "In an increasingly heterogeneous Hengst Group, Jörg Schroeder will further develop the processes and structures that form the basis for our continued growth."

Jörg Schroeder, who holds a degree in business informatics, grew up in Essen and also has a Master of Law (LL.M.) in business law and an Executive MBA from WHU and the Kellogg School of Management. While still a student, he founded a student consultancy and later continued to run it. He then for a total of eleven years at Bitmarck, an IT service provider in the healthcare system based in Essen. Here he held various roles, most recently that of CFO.

In 2019, Schroeder joined Adesso in Dortmund as Chief Financial Officer and was responsible for Finance, Controlling, Investor Relations, M&A and Adesso Ventures. During his time, Adesso almost tripled both its turnover and its number of employees.

Hengst Filtration is looking forward to Jörg Schroeder and how he will enrich the company as its new CFO.

Press release

The whole world of filtration.

As a family-owned company with 3,700 employees at 28 locations, Hengst Filtration stands for innovative solutions in filtration and fluid management worldwide.

Our products contribute millions of times over to making the world a better place. But we can do even better. We think filtration - in everything we do. We supply technologically leading filtration systems in the fields of plant and mechanical engineering, industrial filtration, hydraulics, life science and healthcare. Our customized solutions are used in medical cleanrooms, air conditioning systems, cleaning equipment, industrial systems, power tools and robots.

We are also a series supplier to the international vehicle and engine industry and a development partner for sustainable drive and mobility concepts.

Making our planet a purer place.

Mobility, health, economy, environmental protection & sustainability: we work on the big issues of our time every day. And with the aim of making the planet a cleaner place. In doing so, we make future-oriented technologies possible in all industries worldwide.
